DESCRIPTION:
- 100% Acrylic-based elastomeric textured finish.
- DPR (Dirt Pick-up Resistance) chemistry
- Highly flexible: can bridge existing hairline cracks.
- Integrally colored with high quality pigments.

USES:
Finishing coat for:
- New or existing stucco and concrete surfaces.
- Renovation of old stucco and concrete walls.
- Finishing of masonry walls in combination with any LaHabra Insul-Bond Basecoat & Adhesive as leveler.

COMPOSITION:
- Binder base: 100% Acrylic polymer with surface-hardening property.
- Aggregate: Pure crushed marble, rust-free.
- Water based: VOC-Compliant. Meets SCAQMD Rule 1113 when using Parex USA Non-VOC Colorants.
- Pigment base: Titanium dioxide.
- Color: LaHabra standard colors or tinted to desired custom color.

- **Coarse**
- **Swirl**

### Test Method Results

- Accelerated Weathering: ASTM G153 Pass
- Resistance to wind-driven rain: TT-C-555B Pass
- Mildew Testing: ASTM D3273 No growth
- Vapor Permeability: ASTM E96 Water Vapor Permeable
**COVERAGE:**
Depending on the condition of the substrate and method of application, approximate coverages per pail are:
- **Fine**
  - Aggregate size: 1.0mm
  - 150 - 165 ft² (14 - 15 m²)
- **Coarse**
  - Aggregate size: 1.5mm
  - 120 - 135 ft² (11 - 12.5 m²)
- **Swirl**
  - Aggregate size: 1.5mm
  - 120 - 135 ft² (11 - 12.5 m²)

**CONTAINER:**
65 lbs. (29.5 kg) net weight in plastic pails.
- **Storage:** Protect from direct sunlight and freezing at all times.
- **Do not stack pails more than 3 pails high.**
- **Shelf Life:** Reference Parex USA Expiration Date of Products Technical Bulletin.

**DRYING TIME:**
24-48 hours under normal conditions. High humidity and low temperatures extend drying time.

**CLEAN-UP:**
Water soluble prior to drying. Clean tools and containers with water prior to drying.

**SURFACE PREPARATION:**
- Remove surface contaminants such as dust or dirt without damaging the substrate.
- For previously painted surfaces, all loose and chalking paint must be removed, and glossy surfaces dulled.
- New concrete and masonry must be clean and cured a minimum of 28 days.
- Check concrete surfaces for alkalinity and treat. Any form-release agents or bond breakers must be removed.
- Uneven concrete or masonry can be leveled with Level Coat, LaHabra Insul-bond, LaHabra Polybond, LaHabra Fiber-47 Fastwall Scratch & Brown, LaHabra Fastwall Stucco Base or other suitable compatible product.

**MIXING:**
- Use clean equipment for mixing and preparation.
- Add liquid color to the pail of finish. Make sure all of the color is added by rinsing out the color vial with water (1/3 of the vials volume) into the pail.
- Stir to obtain a homogeneous consistency using a heavy-duty 1/2 in. (13 mm) drill with a rust-free paddle at 400-500 rpm. Avoid air entrainment.
- A small amount of cool, clean, potable water may be added to aid workability. Do not exceed 8 oz. (0.25 L) per full pail of finish. To avoid color and texture variations, add the same amount of water to each pail of finish.

**APPLICATION:**
- Read the entire label before using this product.
- Always maintain a wet edge and work to corners or joints. For best color consistency, use finish with the same batch number within a wall section. Keep container closed when not in use.
- Use a clean stainless steel trowel and apply a uniform coat the thickness of the largest aggregate size of the finish.
- Texturing: Use a clean plastic float or stainless steel trowel, wipe frequently. Apply moderate pressure with consistent motion, rolling the large aggregates to obtain the desired texture.

**LIMITATIONS:**
- For interior drywall, prepare as for painting, minimum level 3 drywall finish.
- Parex USA recommends the use of primers to enhance the appearance and uniformity of the finish, improved coverage, and decrease the chance of efflorescence. This is especially true when using dark colors or finishes with a large aggregate. If specified, prime with Parex USA Primer or Variance VariPrime Sanded, refer to Product Data Sheet.
- For additional options, contact Parex USA Technical Support.
