

The Plus Advantage & Silicone Additives

Finish and Coating Enhancement for Acrylic and Elastomeric Finishes

DESCRIPTION

The Plus Advantage

- Additional dose of biocide protectant formulated at the manufacturing plant
- Available as an add on to any Parex USA finish or coating
- Gives additional protection in areas where temperatures and moisture conditions foster rapid algae and mildew growth

Silicone Additive

- Silicone additive included at the manufacturing plant
- Available as an add on to any Parex USA finish or coating
- Provides enhanced UV protection for finishes and coatings to prevent damage from the sun
- Improves water repellency of any Parex USA finish or coating
- Does not impact water vapor permeability which ensures that the finish or coating bond to the substrate remains strong
- More difficult for dirt and contaminants to stick to the wall
- Easier to clean surfaces
